

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

OMB APPROVED  
0579-0036  
Exp.: 10/31/2018

This report is required by law (7 U.S.C. 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150.

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

OMB APPROVED  
0579-0036  
Exp.: 10/31/2018

This report is required by law (7 U.S.C. 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150.

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets, if necessary.)

FACILITY LOCATIONS (Sites)

(b)(7)(F)

REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets, if necessary, or use APHIS FORM 7023A.)

A.  Animals Covered By The Animal Welfare Regulations	B.  Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C.  Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D.  Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E.  Number of animals upon which teaching, experiments, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress on these animals and the reasons such drugs were not used must be attached to this report.)	F.  TOTAL NUMBER OF ANIMALS  (Cols. C + D + E)
4. Dogs	0	0	49	0	49
5. Cats	0	0	43	0	43
6. Guinea Pigs	0	4	0	0	4
7. Hamsters	0	0	0	0	0
8. Rabbits	0	4	0	0	4
9. Non-human Primates	0	0	0	0	0
10. Sheep	0	10	0	0	10
11. Pigs	0	0	0	0	0
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C.  Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D.  Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E.  Number of animals upon which teaching, experiments, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress on these animals and the reasons such drugs were not used must be attached to this report.)	F.  TOTAL NUMBER OF ANIMALS  (Cols. C + D + E)
4. Dogs	0	0	0	0	0
5. Cats	0	0	0	0	0
6. Guinea Pigs	0	0	0	0	0
7. Hamsters	0	0	0	0	0
8. Rabbits	0	0	2	0	2
9. Non-human Primates	0	0	0	0	0
10. Sheep	0	0	0	0	0
11. Pigs	0	0	78	0	78
12. Other Farm Animals					
13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL  
(Chief Executive Officer (C.E.O.) or Legally Responsible Institutional Official (I.O.))

I certify that the above is true, correct, and complete (7 U.S.C. Section 2143).

SIGNATURE OF C.E.O. OR I.O.

**2013 Annual Report Exceptions to the Act**

47-R-0018

2 pigs had food withheld for 48 hours to ensure an empty gastrointestinal tract for non-survival gastrointestinal surgical procedures. These animals were offered Gatorade during this pre-operative period. This exception was reviewed and approved by the UNMC/UNO IACUC prior to performing the procedures.

27 NHP's were single housed for diagnostic testing during a quarantine period and/or for scientific reasons set forth in the research protocol. Once the quarantine period was completed, 13 animals were placed into group housing. These exceptions were reviewed and approved by the UNMC/UNO IACUC prior to single housing.

## Column E Explanations

Registration Number: 47-R-0018

**Species: Rabbit**

**Number: 4**

4 rabbits experienced sudden death without prior clinical signs due to peracute septic bacterial endocarditis as a result of the approved protocol and analgesics or other drugs could not be administered.

**Species: Rabbit**

**Number: 17**

17 rabbits had a miniature subcutaneous osmotic minipump inserted through a skin incision, approximately 1.0 cm in length, with the anesthesia regimen that included skin incision site infiltration with lidocaine HCL, and parenteral ketamine and xylazine. These animals did not receive additional post-operative analgesics. Although the procedure is classified as a minor surgery, it is possible that these animals may have experienced more than momentary pain or distress.

### Amendment to Column E Explanations

The initial report on the 2013 Annual USDA Report, indicated "17 rabbits had a miniature subcutaneous osmotic minipump inserted through a skin incision, approximately 1.0 cm in length, with the anesthesia regimen that included skin incision site infiltration with lidocaine HCL, and parenteral ketamine and xylazine. Although the procedure is classified as a minor surgery, it is possible that these animals may have experienced more than momentary pain or distress."

Clarification - While the 17 rabbits did not demonstrate any observable clinical signs of pain or distress following this minor procedure, the institution decided to report them under Category E on the 2013 Annual Report because VMO inspectors cited UNMC with a non-compliant IACUC protocol item (NCI) during the August 12, 2013 unannounced inspection. This was based only on the **possibility** that they could have experienced unrelieved pain/discomfort/distress that was not observed. However, they did not show any observable signs of unrelieved pain/discomfort/distress.

The NCI citation was for 17 rabbits that underwent the osmotic minipump procedure because those animals did not receive one dose of buprenorphine, following parenteral ketamine and xylazine general anesthesia, and skin incision site infiltration with lidocaine hydrochloride at the time of the minipump implant. The citation, on the inspection report, was listed under 2.31 (c) (7)—"significant changes were made to protocol 97-032 without the approval of the IACUC." The approved protocol indicated that "For all other minor surgical procedures, buprenorphine will be given prior to recovery from anesthesia 1 time unless the animal shows signs of needing more analgesics...." The investigator's staff failed to administer the one dose of buprenorphine, following general anesthesia and lidocaine infiltration for these rabbits and thus the investigator's staff did not follow the approved protocol.

Following the USDA inspection, the 2011 and 2012 reports were amended to also include rabbits that underwent the mini-pump procedure to be categorized as Category E animals since there was a possibility that those animals could have experienced unrelieved pain/distress even though signs of pain, discomfort and/or distress were not observed.

Following the August 2013 USDA inspection, immediate action was taken to correct the cited non-compliance. Since the corrective action was completed by the institution, all rabbits undergoing this minor procedure have received the additional IACUC approved 3 tier post-operative analgesia regimen, i.e., buprenorphine in addition to local anesthetic infiltration of the skin incision site and parenteral ketamine/xylazine general anesthesia.
